

PMM + V4S

SFDO Community Sprint - February 2021

Meet your project leadership team

Deanne Walters
Manager, Salesforce
Communities at New
Leaders

Sandra Prieto
Marketing & BD Associate
North Peak Solutions

Icebreaker!

What type of cereal are you?

The problem(s)

Nonprofits are unsure if they should use PMM or V4S.

Nonprofits who are using both PMM and V4S want to know the best way to integrate them.

What We Have Done

1. V4S and PMM Comparison information - comparing features and limitations of each
2. Created documentation for a Flow to help with hybrid PMM and V4S model

Ideas on What We Want to Do Next

1. Reviewing and editing documentation on the comparison guidance
2. Figuring out how to integrate Service Scheduling (PMM) with V4S
3. Other ideas?

Description

A Community Sprint project group to draft a recipe doc to connect Program Module (PMM) and Volunteers for Salesforce (V4S) open source products!

PMM and V4S users have asked for guidance and a recipe guide to help connecting these two open source app's where and when you use these products and are interesting in creating

Information

Important: If you have specific asks to help move this project forward we would recommend that you list them here, but also create separate Issues for each and add the label of "help wanted". This is a well-worn best practice for projects living in GitHub.
