# PMM + V4S

SFDO Mini Community Sprint - April 2021

# Meet your project leadership team

Deanne Walters
Manager, Salesforce
Communities at New
Leaders

Sandra Prieto
Marketing & BD Associate
North Peak Solutions

**Icebreaker!**

# What have you been obsessing over recently?

# The problem(s)

Nonprofits are unsure if they should use PMM or V4S.

Nonprofits who are using both PMM and V4S want to know the best way to integrate them.

# What We Have Done

1. V4S and PMM Comparison information - comparing features and limitations of each
2. Created PMM v. V4S Infographic
3. Created documentation for a Flow to help with hybrid PMM and V4S model connecting Volunteer Hours with Service Delivery
4. Created user stories
5. Start Flow with Connections objects to connect Volunteer Hours and Service Delivery (in GitHub and documentation)
6. Got onto Metecho!

# Ideas on What We Want to Do Next

1. Moving documentation into GitHub webpage (like the Data Gen Team)

2. Expand the connections Flow to have the ability to start from multiple objects

3. How to manage mentor/mentee relationships

Description

A Community Sprint project group to draft a recipe doc to connect Progra
Module (PMM) and Volunteers for Salesforce (V4S) open source products

PMM and V4S users have asked for guidance and a recipe guide to
connecting these two open source app's where and wh
you use these products and are interesting in craft

Information

## Project Documentation

Jamboard - https://jamboard.google.com/d/1T0g_fahg2ES7MhyFRHArDstwbVtzvuu6ziW2IG0XnDM/edit?usp=sharing

Google Doc - https://docs.google.com/document/d/1osMFz2RlHEzABUDrk8wVOor2JmxjmYHudgAobXJZe-8/edit?usp=sharing

Flow for Hybrid Volunteer Hours - https://drive.google.com/file/d/1HkG1JDPxbHj2PJ8hmgad_vNAFfRxRdll/view?usp=sharing

**Important**: If you have specific asks to help move this project forward we would recommend that you list them here, but also create separate Issues for each and add the label of "help wanted". This is a well-worn best practice for projects living in GitHub.
